LETTER OF RECOMMENDATION

It is my pleasure to write this letter of recommendation for **Mosisa Ayano** whom I know as a student since October 2011 E.C. He was one of the excellent BSc nursing student in the department of nursing. As a student, **Mosisa** was intelligent, enthusiastic, skillful, devoted and passionate to learn new things.

He witnessed his academic potential & attitude towards the nursing profession during his clinical practice attachments while he was assigned in different health institutions. He has also actively participated in the community based training program (CBTP) and team training program (TTP) where he has demonstrated his competency of generating ideas in solving community problems.

He has also demonstrated his due potential in his research project work. Over-all, he has a notable achievement in his entire academic performance.

Regarding his personality, he is positive, honest and has good relation with his colleagues both in teaching department and the clinical attachment areas.

In general, I would like to promise any one that he can shoulder any academic, professional and leadership obligation.

Finally, I wish him all the very best in his future career.
