

Dear Admissions Committee,

As an advocate for harmonizing engineering with the environment, I am thrilled to share my journey and commitment through this letter. Having successfully navigated my studies in Construction Technology and Management at Dilla University in Ethiopia, I am eager to apply my skills and knowledge to address pressing environmental challenges.

Personalized Introduction: From the intricate dance of steel and nature, where engineering meets the environment, I discovered my true calling—forging a sustainable alliance between technology and our planet. My passion lies in creating solutions that not only enhance infrastructure but also safeguard our natural resources.

Alignment with Program Goals: I have researched the Environmental Engineering program at the University of Marche extensively and am impressed by its focus on interdisciplinary collaboration, cutting-edge research, and practical applications. The program's commitment to sustainable development resonates deeply with my values.

Relevant Experience: During my studies, I actively participated in construction projects, gaining hands-on experience in project management, site supervision, and quality control. I collaborated with diverse teams, ensuring that our work adhered to environmental standards. Additionally, I interned with Ayat Share Company where I contributed to sustainable building practices and waste reduction initiatives.

Environmental Values: Beyond academic pursuits, my commitment to sustainability extends to my daily life. I volunteer with local environmental organizations, participate in tree-planting drives, and advocate for eco-friendly practices. I believe that environmental consciousness should permeate every aspect of our work, from design to implementation.

Future Impact Statement: Looking ahead, I envision myself as a catalyst for positive change. I aspire to develop innovative solutions that mitigate environmental impact, promote renewable energy, and enhance resilience. Whether it's designing eco-friendly buildings or implementing circular economy principles, I am ready to contribute to a greener, more resilient world.

In conclusion, I am excited about the opportunity to join the Environmental Engineering program at the University of Marche. I am confident that my passion, skills, and dedication align perfectly with your mission. Thank you for considering my application.

Sincerely,

Abera Atra
