

JSI Research & Training Institute, Inc.

Date: - Dec 01/2023

Ref No: JSI/DHA/HR/317/23

To Whom It May Concern,

John Snow, Inc. (JSI), headquartered in Washington, D.C., is implementing the flagship project Digital Health Activity (DHA) for the U.S. Government's aid program, supporting the Ethiopian Government Ministry of Health's digital transformation agenda.

Digital Health Activity is a five-year project funded by the United States Agency for International Development (USAID). It supports the Government of Ethiopia (GOE) in achieving the country's Information Revolution Roadmap, one of the four Transformational Agendas of the national Health Sector Transformation Plan (HSTP).

I am delighted to confirm that Sara Woldeyohannes made invaluable contributions as a System Analyst and Software Developer at JSI from November 1, 2022, to November 30, 2023. During this time, she worked on a number of critical projects that delivered impact across a range of health sector interventions.

Throughout her tenure, Sara consistently demonstrated exceptional dedication, adaptability, and a keen problem-solving acumen. Her work not only showcased technical prowess but also a collaborative spirit, positively influencing team dynamics and project outcomes.

Sara exceeded expectations by consistently delivering high-quality work within tight deadlines. Her commitment, coupled with strong communication skills, made her an indispensable asset to our team.

I wholeheartedly recommend Sara and am confident that she will excel in any future endeavors. Please feel free to reach out for further insights or inquiries.

Sincerely,

Ayaleket Shiferaw
Deputy Chief of Party
USAID Digital Health Activity, John Snow Inc.
